/inspirations

LOUIS products are created directly from aesthetic longing. Longing for passing worlds full of friendly forms, decorative but geometrically precise. Products designed with a feeling of slight overdose of dominating modernism. Created with the temptation of returning back to the world of decoration and fancy elements discovered in everyday products. Manufactured with the hand of highest grade carpenter, were precision of product mastering is strictly linked to individual approach.

Designing of the LOUIS collection was an exciting journey but a very difficult one at the same time. It has required re-discovering and re-working the design canons that are not my everyday routine. Directing myself towards the styles that are a bit forgotten - more decorative and fancy then, so common in bathroom product design, modernist and minimalist standards. It was about reaching for ArtDeco motives, but with better understanding and creative reworking.

Michał Rożkowski
LOUIS collection designer

/interiors

Combination of interior cleanliness and classic accents creates ideal background for LOUIS collection. Followers of simplicity and visual calmness will appreciate for sure harmonious coexistence of the products. Friendly and soft shapes of furniture and washbasins are the reference to the time where aesthetic values were not compromised by technology or costs. In such a stylization we especially recommend, as long as possible, to light the bathroom with natural, external lighting that will further underline the shape of products with emotional accents.

LOUIS CLASSIC

LOUIS collection consist of comfortable and functional washbasins offered together with spacious cabinets. Their rounded shapes and well-rounded details brings the impression of lightness and joy. Furniture pieces are neat and their connection to washbasins are precisely finetuned.

The boundaries between different home spaces are slowly disappearing in contemporary interior design. Clear example of this tendency – a LOUIS vanity unit is a cabinet with single drawer on tall legs. When connected with the worktop one can create an ideal place for everyday make-up and personal care, where cosmetics and products are easily accessible and the well organised drawer will make those activities a pleasant rituals. The installation of such a cabinet is not limited to a bathroom, it can be done easily in a bedroom.

Supplementary products for LOUIS collections- the tall cabinets. They will ideally complete your interior, being visually linked to other products as same details and same design language applied.

Opposite page// Should your bathroom amaze not only with the styling and design but the functionality as well - there's no better choice than double-bowl washbasin 144 cm. combined together with the set of three washbasin cabinets. The huge storage space is in that case very well organised as we have six, differently sized drawers available in the area of best reach when using the washbasin.

Softly profiled edges visually close the furniture piece shape as well as improve its functionality with easier maintenance and creating a barrier for coincidentally loosing the elements from the worktop' surface.

Silky matte surface of the vanity unit worktop gently correspond with the clean glossiness of the fronts and the sides. It is nice to touch; forming it out of *solid surface* material assures relevant strength and resistance of the surface.

/interiors

ArtDeco styling is the LOUIS element. It has been created while thinking about contrasted finishes, noble materials and decorative details. It is driven by the canons of the first half of 20th century decorative design. And, when faces contemporary and common modernist approach this styling seems to be a bit underestimated. We believe however it's worth to come back and re-discover the importance of proportions and freedom in designed products.

— 14

LOUIS ARTDECO

The popular size of the wash basin 82 has been proposed as well in the black matte finish. It can be ideally composed with black glossiness of the cabinets in monochromatic interior designs.

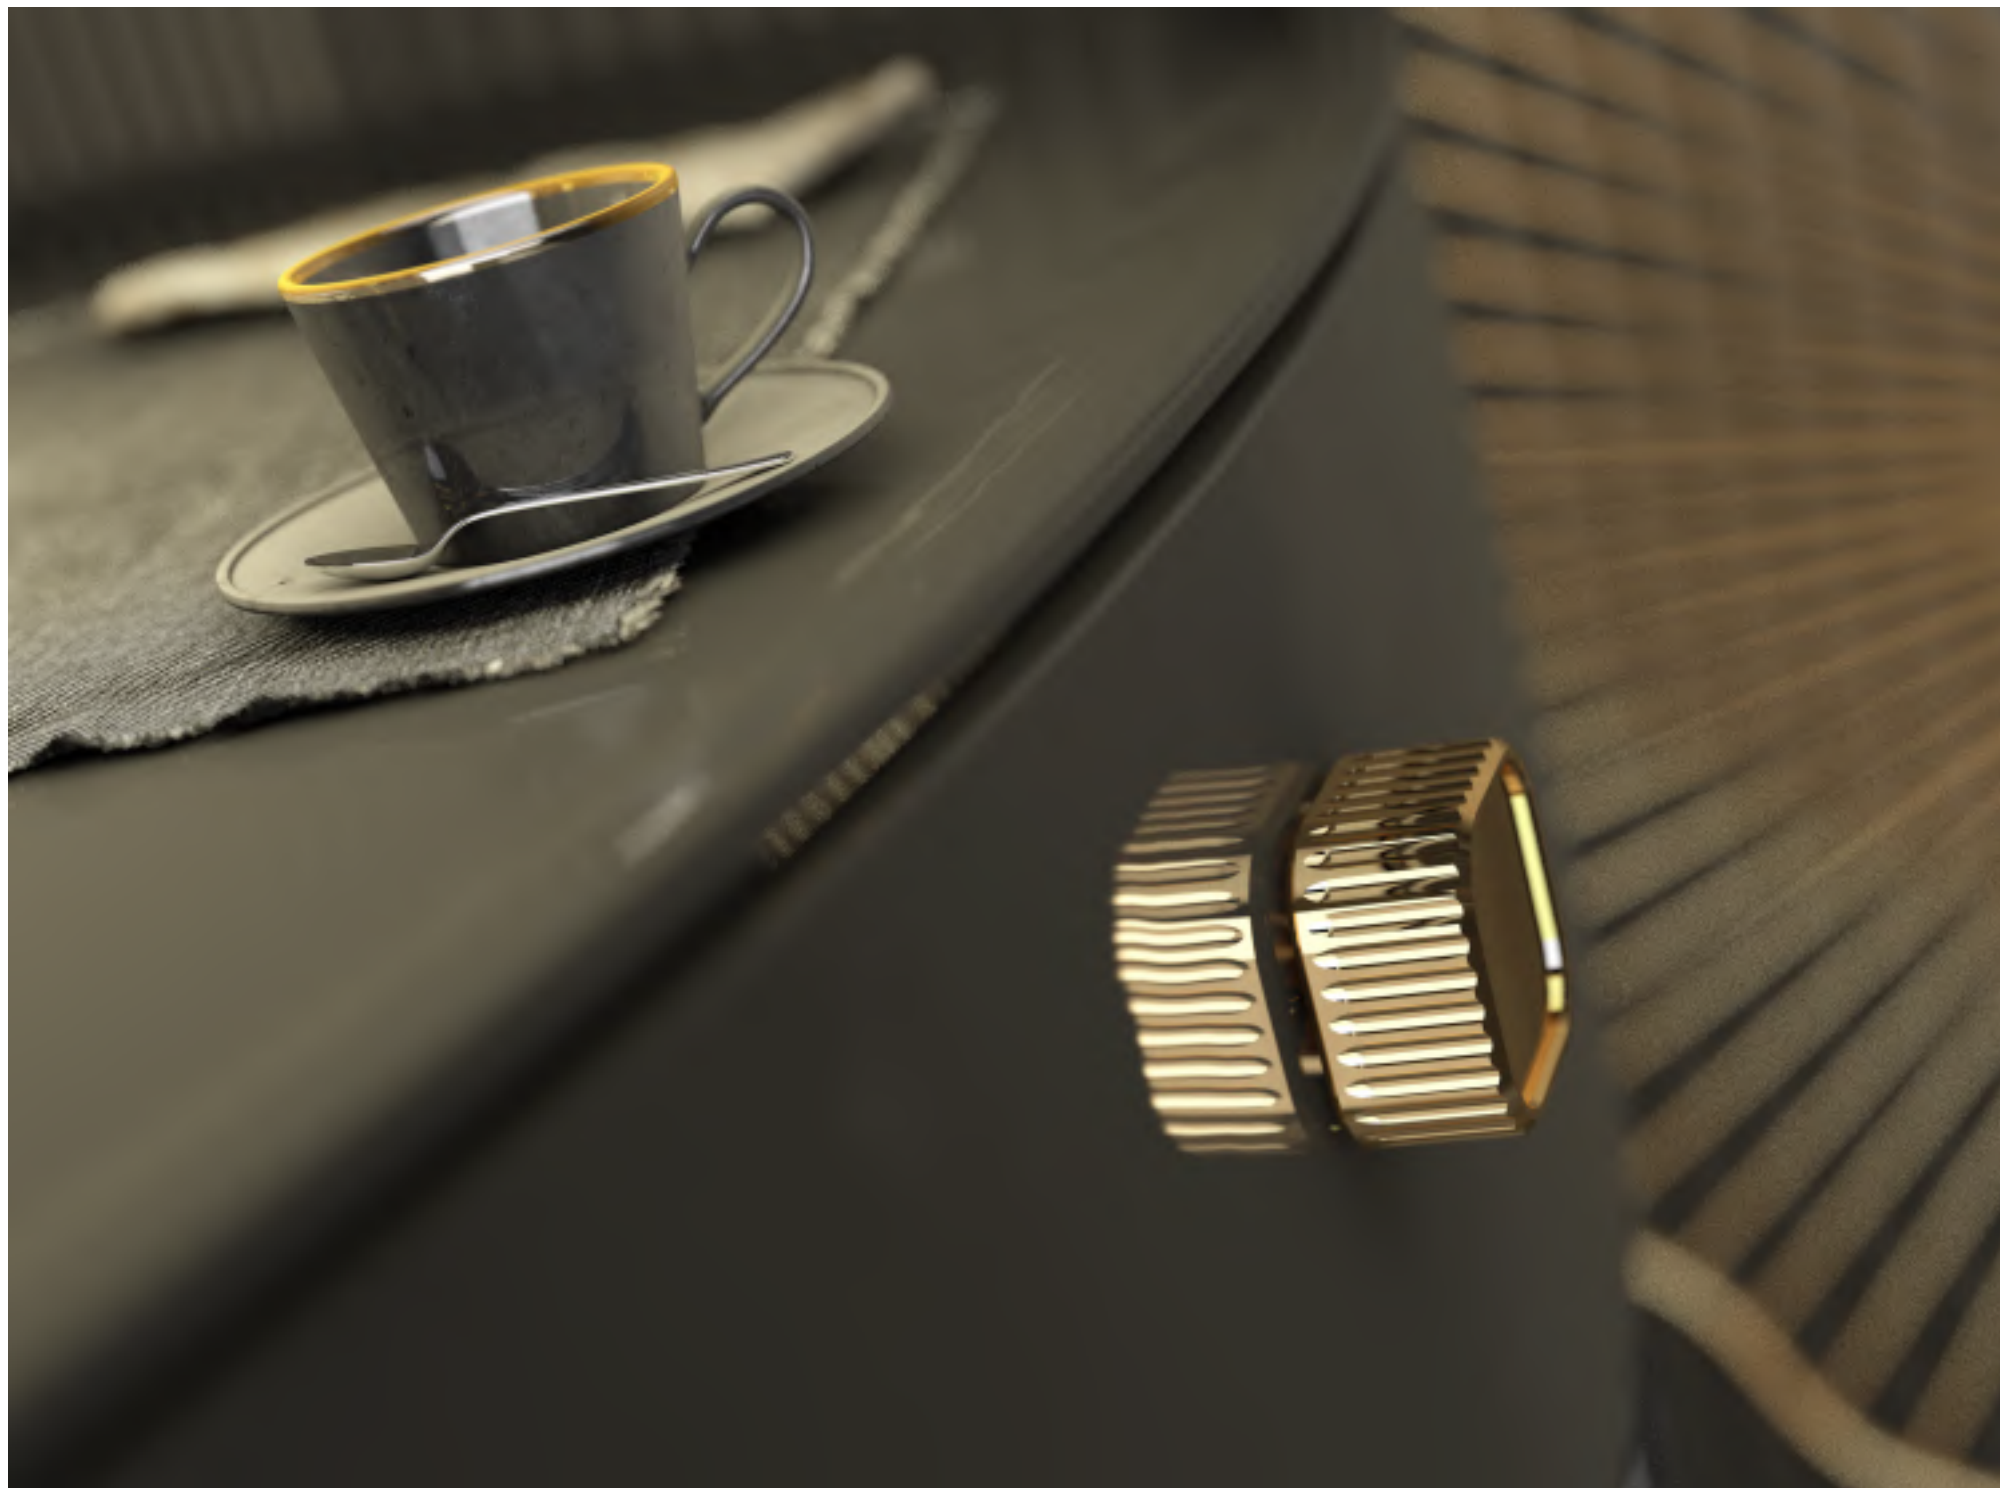

Black glossiness of the LOUIS furniture will present itself especially smartly when surrounded by black environment of the bathroom. Such a courageous combination, further completed with the golden add-ons and accessories would create a direct reference to ArtDeco styling in its best release.

Double drawer, 82 cm. cabinet when assembled with the worktop creates the dresser that can be installed as well outside of the bathroom. It will perfectly match to the bedroom or even a properly designed dayroom. LOUIS handle although designed independently from the entire collection, has been designed by the same designer. It perfectly supplements the furniture pieces, with kind of a jewellery detail that underlines the luxury character of the collection.

Worktop of the vanity unit is solid surface made, here with the finish adjusted to the black lacquer of the furniture, and carefully (100% handmade!) polished. Other way than in the wash basin cabinets, the legs in the vanity unit are delivered together with the cabinet so there's no need to order it separately.

/interiors

Modern interior and more traditional products? Yes, such a connection is possible. A keyword to successful combination is a “contrast” in that case. Noble deep glossiness or silky matte surface of the furniture very well correspond to rough concrete of the lofty interior. Soft curvature of the furniture is contrasted with the natural roughness of the walls. Such a courageous solutions creates the unobvious interiors that is full of individual spirit.

— 22

LOUIS lofty

Stunning comfort and functionality can be achieved when two 62 cm. cabinets are installed together with washbasins in one bathroom. In order to visually fit the products best to your interior – mat or glossy washbasin can be selected from LOUIS range.

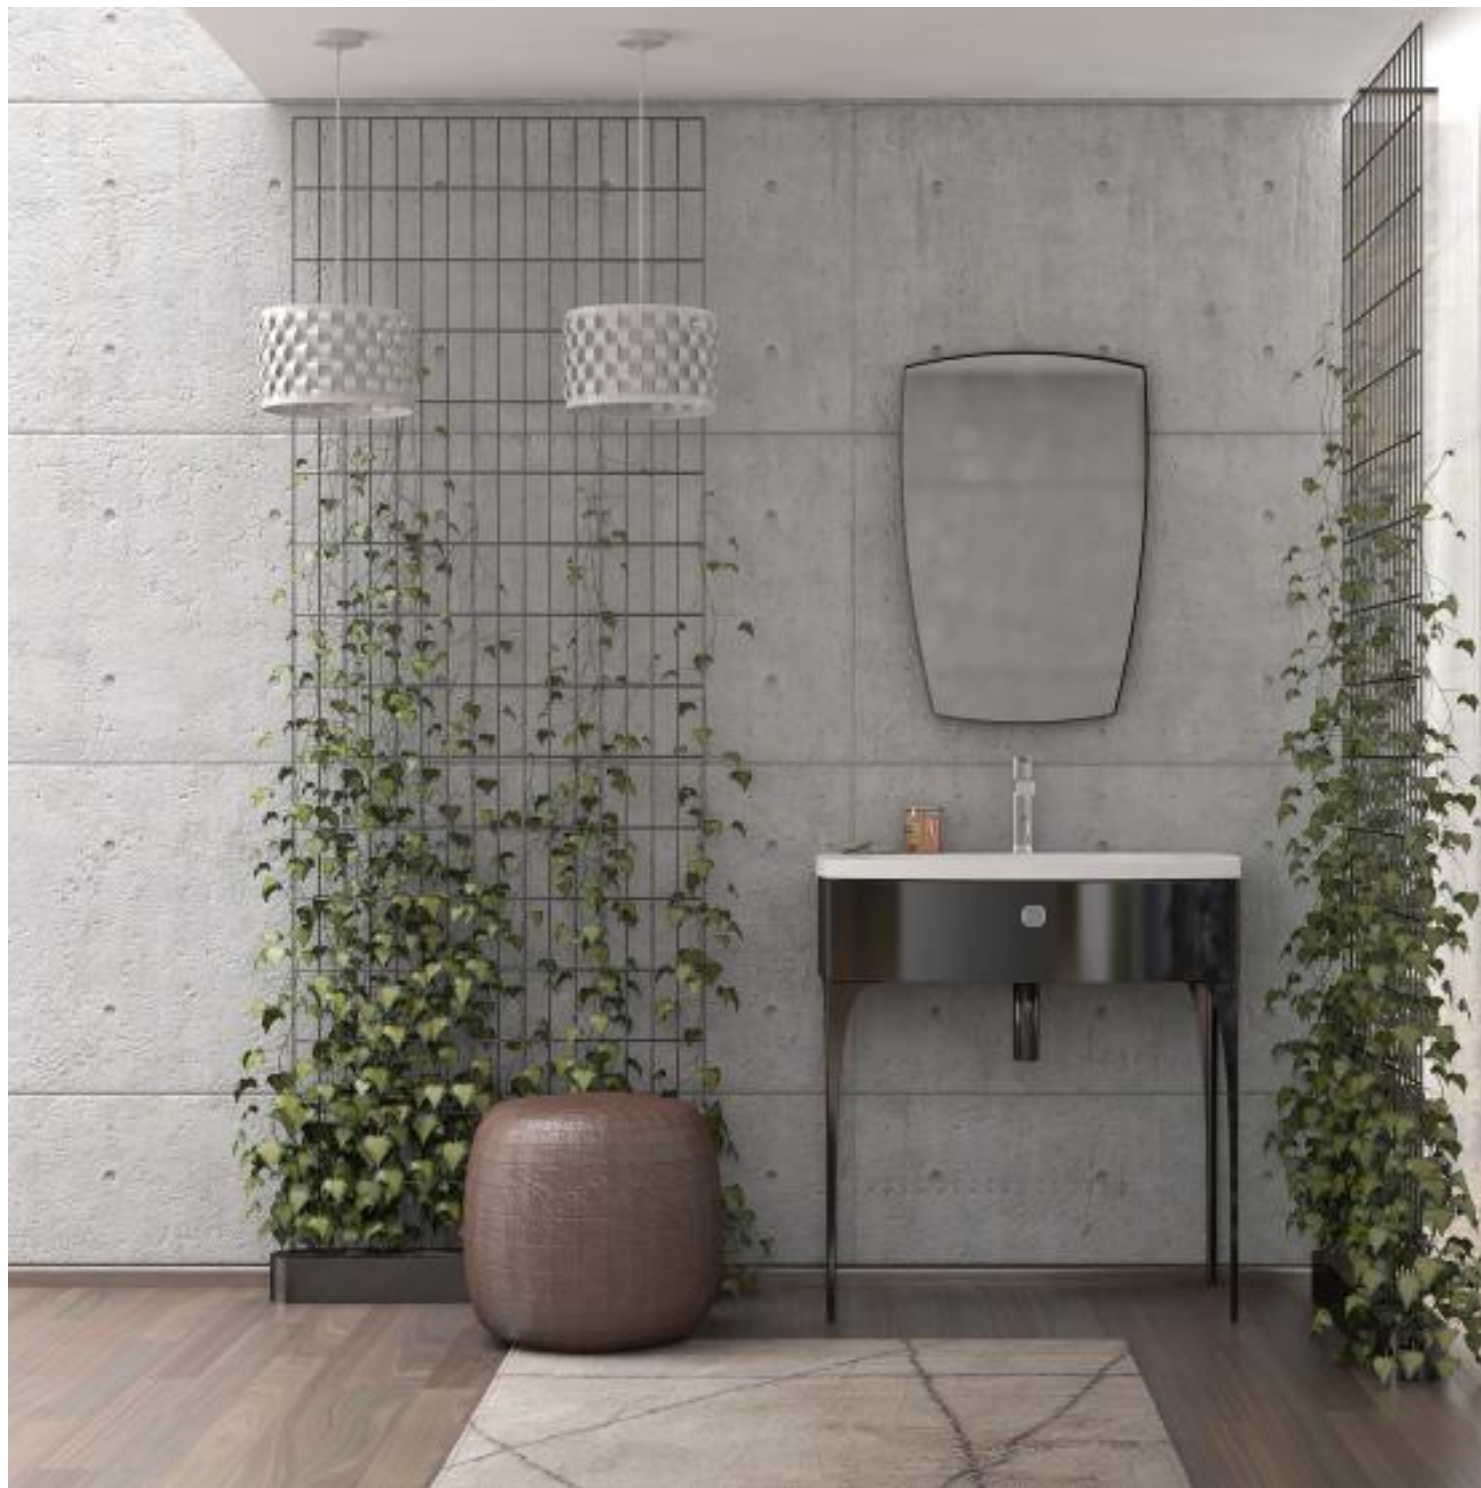

Tall side cabinet, with its spacious interior will perfectly complement the storage in your bathroom. And, since the design of the cabinet is universal – no issue to install it in other then bathroom home spaces.

Spacious interiors, full of natural surfaces and home plants creates ideal background for LOUIS products, where it's proportions and design details are clearly visible.

Single drawer cabinet supported on high legs can be both combined with washbasins and the worktop. Comfortable washplace in the first case or handy vanity table in the second are the impressive results of the combination.

Such an assembly is a temple for everyday cosmetic rituals, combining stunning visual values with functional storage space. The functionality is further improved with the drawer organizer's to keep all the cosmetics in the right order.

Universal chest of drawers achieved through covering the 82 cm. cabinet with the worktop will easily fit both bathroom as well as other interiors. Solid surface worktop is mechanically and chemically resistant and easy to maintain.

Worktop area is big enough to fit all the necessary bathroom elements and, even further – some interior style adjusted decorations will find it's place there.

Since all LOUIS cabinets are equipped with wall hangers, it can be as well installed without the legs.

/interiors

Sun of Tuscany and it's unmistakable scents? That is as well ideal background for LOUIS! Its shapes and surfaces well correspond with such lovely appreciated elements of Mediterranean architecture. The history written it stone and noble aged stuccos will open a new chapters with LOUIS furniture.

— 32

LOUIS IN TUSCANY

We do recommend mat washbasins to all bathrooms furnished with LOUIS furniture in Mediterranean style as best fitted to its commonly rich and diversified wall surfaces.

Spacious interior divided with thick glass shelves and closed with two doors – that's LOUIS side cabinet. For better comfort it is universal – one can select right- or left- side opening to adjust to requests of the particular interior design.

Although we do recommend to assemble the optional legs with cabinet of the same color, you can easily find the other composition, best fitting to your preferences.

White mat worktop fits very well when combined with stone, old stucco or wooden walls. Such an assembly is especially impressive when reinforced with dedicated decoration.

Another example where vanity unit impressively complete your interior. Carefully and precisely assembled elements, apart from perfect function, will deliver the impression of exceptional luxury.

Despite the combination of LOUIS furniture with legs, still it is necessary to fix it to the walls for stability reasons. The adjustable wall hangers and feet secures perfect installation on naturally uneven surfaces like a stone or concrete.

LOUIS furniture plain surfaces nicely contrasts with naturally diversified interior walls. When designed together as a mean of intentional contrast – it brings a blow of variety to your interiors, where LOUIS values are vividly highlighted.

/colors

black gloss

– combination of exclusivity and nobility of finish to underline precision and design of details. Deep glossy effect is further enriched with the curvature of the elements and created the luxury background for the golden glossy handle.

white gloss

– modesty and nobility that will work in any interior. The impression of cleanliness is reinforced with handle that has same finish as panels.

dark blue mat

– fashionable, intriguing color, well exposed thanks to nicely perceived deep mat finish. Another LOUIS incarnation, with mono-coloured handles.

/colors

handle options

Depending on your preferences and styling of your interiors, on top of the handles assembled to the cabinets we the alternatives in five different colors/ finishes. Apart the colors of the furniture (black and white gloss, and dark blue mat) we do offer glossy chrome and gold.

—46

installation

For stability reasons and precision of assembly it is necessary to fix the furniture pieces to the wall, despite its leg installation. Adjustment of the legs is a feature designed to correct eventual unevenness of the floor.

interior standard

LOUIS furniture interiors are finished with toned dark graphite colors. While the upper drawer is divided with metal organizer for better order of stored elements, the bottom one offers full volume for big products storing. Additionally it is equipped with anti-slip matt, to prevents stored elements from incidental movement. The organizer of upper drawer is made from metal, powder coated elements where the combination of strength and durability with delicate and subtle design has been achieved. The drawers are based on best-in-class BLUM Legrabox where pulling out is easy even under a load and smooth operations, full extension and soft close features are bringing the impression of enormous comfort and functionality.

/specification

universal 82 cm cabinets

82 cm. cabinets, with both single and double drawers can be combined with synthetic washbasin as well as solid surface worktop. As relevant stability and stiffness have to be secured, it is important to install first the supporting rail when combining with the worktop, regardless of the cabinet used. For worktop setup, additional element is delivered with the worktop to cover the siphon cut-out and make use of the whole drawer.

side, tall cabinets

Graphite interior of the tall cabinet is equipped with fixed thick glass shelves, with graphite glass shade adjusted to the color of the entire interior. Increased glass thickness as well as carefully selected shelf supports underlines the stability and strength, but express the luxury style at the same time.

Washplace 144 cm. set

In order to achieve 144 cm. furniture set covered with dedicated, double bowl washbasins, one need to collect 2 cabinets 62 cm. and assemble it with additional cabinet – connector. This cabinet should be installed in the middle part underneath of the washbasin. As all elements are 3d adjustable, therefore there's no need to connect it together. It is enough to install all cabinets separately and properly adjust its position prior to covering with the washbasin. Although for design reasons we do recommend to install only the outer legs of such a set, it is feasible to install the others as well.
